

## About Us

Founded in 2009, the Global Peace Foundation (GPF) is a 501(c)(3) non-profit organization based in the Washington D.C. metro area. GPF is dedicated to uplifting the common humanity of all people, and to that end, leads a global network of locally-led affiliates dedicated to peacebuilding. Our initiatives span targeted violence and terrorism prevention, threat assessment preparedness, community policing and democracy strengthening.

As a recognized leader in preventing violent extremism, GPF has implemented multiple grants from the **U.S. Department of Homeland Security** and has served as a lead subcontractor under the **Maryland Department of Emergency Management's** threat assessment project. Our senior team members excel in research, curriculum development, and implementing innovative strategies that have significantly impacted communities both domestically and internationally.

## Project Management and Evaluation

Our senior team has extensive expertise in partnership development, project design and management, implementation oversight, and evaluation, alongside robust award management, compliance and reporting skills to support consortia efforts. Our performance evaluations and data analysis, conducted in collaboration with esteemed institutions like the Walter Rand Institute at Rutgers University and Research Triangle Institute, inform organizational learnings and enhance our project outcomes.

FOUNDATION

## What We Do

Global Peace Foundation's Violence Prevention Portfolio consists of institutionally-funded projects designed to build peace, resiliency and safer communities. Our evidence-based projects include a variety of **peacebuilding** efforts in the **United States** and internationally, with current focus areas in **Tanzania and Nigeria**.

- Preventing Targeted Violence and Hate Crimes
- Preventing Violent Extremism
- Community Peacebuilding
- Countering Financing of Terrorism
- Community Policing
- Preventing Electoral Violence
- Safer Digital Communities
- Countering Mis-Dis-Mal Information
- Threat Assessment Preparedness
- Research Projects and Community Assessments

## How We Work

### OUR APPROACH

GPF collaborates with a diverse range of civil society, private, and public sector partners to conduct needs assessments, implement peacebuilding projects, and collect impact data for our evidence-based interventions. Our approaches have been validated by independent evaluations showcasing tangible results.

Our initiatives encompass in-person and webinar trainings, workshops, and community-driven projects, including youth leadership, project design, and community service projects, supplemented by mini-grant programs. We excel in fostering interactions among diverse community members and stakeholders, a cornerstone of our methodology.

Additionally, we utilize digital campaigning and social media to shift social norms, share resources, and elevate awareness on critical issues, employing advanced big data analytics to gauge engagement and sentiment shifts.

We engage community stakeholders, including law enforcement, national bodies, NGOs, faith leaders, women, and youth with a high level of cultural competency and respect for civil rights and civil liberties.

## Current Offerings

Our curricula and content is politically neutral, evidence-based and data-driven, and reflective of best practices in our field. Our current topics:

- Mobilization to Violence and Concerning Signs
- Bystander and Upstander Training
- Countering Financing of Terrorism
- Preventing Violent Extremism in East Africa
- Referral Services Training
- Media Literacy and Online Critical Thinking
- Threat Assessment Protocols
- Youth Leadership Development and Design Lab
